

What kinds of information are most useful?

How do we make this information accessible to communities?

What is the best way for communities to share knowledge with one another?

Here it is with results with fewer categories....

What kinds of information are most useful?	Not useful	Neutral	Useful
Renewable energy options	0%	0%	100%
Economics of renewable energy options	0%	4%	96%
Uses for excess renewable energy	8%	4%	88%
Assessment of food, energy, and water security	4%	0%	96%
Connections between renewable energy and food-energy-water security	0%	8%	92%

How do we make this information accessible to communities?	Not useful	Neutral	Useful
Website	4%	26%	71%
Social media	0%	25%	75%
Videos	0%	15%	85%
Conferences and gatherings	0%	15%	85%
Fact sheets	4%	26%	71%

What is the best way for communities to share knowledge with one another?	Not useful	Neutral	Useful
Reports	12%	27%	61%
Social media	0%	12%	88%
Conferences	4%	21%	75%
Site visits or exchanges	0%	15%	85%
Trainings	0%	0%	100%
Word of mouth, informal conversations	4%	12%	84%

Ideas generated by audience:

What kinds of information are most useful?

Routes communities can take to pay for renewable energy

Jobs from renewable energy, workforce effects

Long-term maintenance requirements

How do we make this information accessible to communities?

Some communities do not have fast internet and some people do not use internet, so websites might not be the best.

Good websites are those that are fast and have links to apps that people can go to

Sharing videos on social media is good like Amanda's videos

We want demonstrations, step by step instructions. It doesn't matter whether it is local people or researchers in the videos.

Workshops in the communities/ community meetings are the best. To get people there you need free stuff, door prices, food like subway.

If you use factsheets try using the school kids to bring them home. Talk to the kids about the topic, get them excited about it, and then have them take them home.

Demos in communities.

Make data available on renewable energy such as what communities have it and what type.

Maybe we need a link to the atlas gateway on our website.

What is the best way for communities to share knowledge with one another?

Email listserv. We need to put something on our website to generate a listserv.

Maybe tribal energy coordinators are needed. There was one in the audience, he is grant funded.

Is a toolkit a good idea?

A tool that allow us to get a broad idea of what say solar might look like at the community level and household level would be helpful.
